

ECONOMIC and SCENIC ISSUES

- Decrease in private property values, both those properties that would be crossed by the transmission lines and those that will be adjacent to property containing the lines.
- Effect on Conservation Easements previously established in this area.
- Physical effects on the historical landmark, Goodale's Cutoff of the Oregon Trail, and impacts to its cultural significance and as a tourist attraction.
- Potential negative input to Silver Creek – water quality, fisheries, scenic, access and recreation and tourism at this world famous fishery.
- Impacts on scenery near Craters of the Moon, and effects on tourism.
- Visual impact on pristine and outstanding scenery along the route and effects to growing tourism in the area.
- Likelihood of additional transmission lines to be added to this corridor if it is chosen.
- Long term impacts to recreational values in the area and financial impacts to businesses in the City of Carey
